

VIVA 3 Connection Diagram For 100V Lines In Combination With SUB 100V

The connection diagram example shows sound system which could be installed in corporate, retail, food, education and leisure environments. 100V line sound systems with relevant power amplifier can be used in big areas from 100 m² to 1000 m² or more as these systems have no power loss over the speaker cables. Presented diagram shows our latest design small loudspeakers VIVA3 in combination with our compact subwoofer SUB 100V and other AMC products connection possibilities. AMC offers good choice of audio products for simple and reliable sound systems.
